

What is Task Killer?

Task Killer Android App allows you to stop running background processes or apps in your device memory. The Android operating system allows devices to run multiple apps in its memory, which sometime slows down the processing speed and wastes battery.

The alternative is to download Task Killer. This app allows you to stop background processes and apps you don't want to be running and allow you to pick the apps that you want to run. Task Killers app will increase performance to your device and save battery usage at the same time.

Instructions for download:

1. Download the firmware onto your personal computer
2. Plug your Nextbook to your computer using USB cord (provided)
3. Your computer will recognize Nextbook as a portable drive.
4. Drag or copy the downloaded Task Killer software onto your Nextbook
5. Disconnect the Nextbook from your computer
6. On Nextbook, go to explorer in your Menu -> click internal memory -> click on the TaskKiller file -> click installation (make sure connect with AC while doing the update or make sure you have enough battery power)
7. Once done installation, tap on the icon "KillerTask" to run the new application
